

The change in area code to 585 will have serious consequences in this area. Our school district includes students from three counties.

Even more serious is the fact that our local access, 492, extends across county lines.

It would be impossible to know in advance of calling someone whether they are a 585-492-xxxx or a 716-492-xxxx number.

Thank you for considering this complex situation before a 585 change is fully implemented.
